SUMMARY

Computer Science senior at UNT (UNT GPA 3.95), admitted to UNT's MS in Data Engineering program, with IT experience at Prime Controls where I built scripts that cut laptop deployment time by about half. ISC2 Certified in Cybersecurity. Seeking Summer 2027 internships in software engineering, data engineering, or cybersecurity/IT.

EDUCATION

University of North Texas

Denton, TX

B.S. in Computer Science | **UNT GPA: 3.95/4.0**

Expected May 2027

- Admitted to UNT's **MS in Data Engineering** program. Pursuing the Undergraduate Academic Certificate in Cybersecurity.
- **Coursework:** Database Systems, Data Structures, Software Engineering, Computer Networks, Foundations of Cybersecurity, Systems Programming, Applied Statistics. **In progress:** Algorithms, Machine Learning (graduate), NLP (graduate), Capstone I.

EXPERIENCE

Prime Controls

Lewisville, TX

Information Technology Associate (Part-time)

Aug 2026 – Present

- Deploy and support company laptops (roughly 100 deployed since starting as an intern), including standard, engineering, CAD, and BIM builds, asset tagging, and redeployment.
- Troubleshoot and resolve employee laptop issues through IT tickets, and help organize IT inventory.

Information Technology Intern | Prime Controls

Jun 2026 – Aug 2026

- Built a PowerShell deployment script (AI-assisted, tested on real machines) for laptop models no longer on the OS deployer, cutting manual build time from about 45–75 minutes to 25–35 minutes. It has been in use since the end of my internship.
- Automated new-hire profile setup with a script (about 5 minutes down to 2) and verified its output against the team standard.
- Created new-hire accounts from tickets, assigning security group permissions and following naming standards. Cleaned up the team's document mapping security groups to job titles.

Fitmax LLC

Waco, TX

Field Technician (Part-time)

May 2024 – Jul 2024

- Diagnosed and repaired electric vehicle (EV) charging units at client sites using a systematic troubleshooting process, and kept service logs of issues found and parts replaced.

PROJECTS

Built with AI coding assistance. I led design and feature decisions, then reviewed and tested the code.

Stock Trend Dashboard | Python, Streamlit, Plotly, pandas, yfinance

Dec 2025 – Oct 2026

- Built a Streamlit app for exploring stock price trends, with a searchable list of about 5,300 Nasdaq-listed securities and a manual-entry mode for crypto, indices, and other Yahoo Finance tickers.
- Plots five years of daily prices as a candlestick chart with 50-day and 200-day moving averages and a bullish/bearish indicator.
- Cached the ticker list and price data (one hour) with Streamlit, and found and fixed bugs in my own app, including a false bearish signal when a ticker lacked enough history.

Library Management System | C++

Apr 2025 – May 2025

- Built a console application for managing library items, using inheritance and polymorphism for books, CDs, and DVDs, with file I/O so items, patrons, and loans persist between sessions.

TECHNICAL SKILLS

Languages: Python, SQL, C++, PowerShell, HTML/CSS

Data: pandas, Plotly, Streamlit, yfinance

IT & Security: Hardware deployment, IT asset management, troubleshooting, account provisioning and security groups, security fundamentals

Tools: Git, GitHub, VS Code, AI-assisted development

CERTIFICATIONS

ISC2 Certified in Cybersecurity (CC) | *Apr 2026*

UNT Undergraduate Academic Certificate in Cybersecurity | *In progress*

IBM: Tools for Data Science (Mar 2026); Data Science Methodology and Python for Data Science, AI & Development (Dec 2025)

LEADERSHIP

Professional Leadership Program (BUSI 3300), UNT | *Fall 2025* – Mentee paired with an industry mentor; leadership and professional development.
